To Whom It May Concern:

The Sharon Drainage and Streams Authority purchased 100 Tal-Ya trays.

After a year and a half we are witnessing almost perfect percentages of absorption rates of the trees that were planted, even in uneven irrigation conditions. We attribute this success to the use of Tal-Ya trays.

The service provided by Tal-Ya is professional and focused.

We find Tal-Ya to be a reliable supplier and will continue to use their products.

Sincerely,

Dror Epstein

Ecology Engineer
